

Z-Flute™

LithoFlute

Solid Fiber

Graphic Packaging’s Strength portfolio has the ability to leverage a broad range of potential technologies to deliver optimal performance with minimal fiber. As a result, we offer customers heavyweight solutions that are tailored to their specific needs versus focusing on a singular technology to fit all needs.

Sustainability

- Primary raw materials are renewable wood-based fibers from sustainably managed forests or recycled fibers
- Packaging features 55 - 100% recycled content

Operational Efficiency

- Available in both sheet fed and web formats
- Solutions deliver optimal performance with minimal fiber
- Portfolio of product technologies that can deliver the most efficient upgrade solutions for your needs

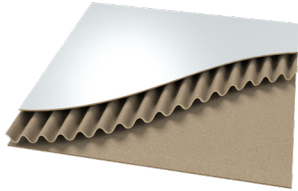

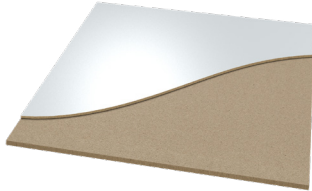

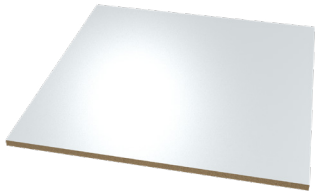

Consumer Experience

- High-quality graphics in a large-size format for stand-out appeal in-aisle or on pallets
- Ecommerce solutions available to reinforce your branding within the delivery environment
- Innovative package structures designed to enhance customer ease-of-use
