

Ensure Guest Satisfaction and Refreshment with Cold&Go™

Today's consumer appreciates the ease of take-out and delivery services and the overall experience of enjoying their preferred cold beverages or frozen treats. Using a cup that underperforms shortly after preparation results in excess condensation, melted treats, and separated blends for your guests.

To address this, we created Cold&Go™, an insulated cup designed to maintain the temperature and quality of drinks. In fact, 89% of consumers prefer insulation over clarity when given the choice between a clear plastic cup and our double-wall paper cup. Cold&Go not only keeps beverages cold but also offers a premium feel and a clean, white surface that enhances your brand's visibility both on the street and on social media.

This cup does more than preserve food and beverage quality. It demonstrates your dedication to providing high-quality service and guest satisfaction.

Sustainability

- Fiber used meets the Sustainable Forestry Initiative® (SFI®) Certified sourcing standards, ensuring that it comes from responsibly managed forests
- Alternative compliance product for brands facing single-use plastic and foam legislation

Operational Efficiency

- Rigid construction makes the cup easier to handle in a busy restaurant
- Exceptional insulation for delivery drinks and frozen treat
- Clear lid for quick drink identification
- SKU consolidation when using different cold cup packaging substrates

Consumer Experience

- Impactful graphics to enhance brand recognition, both inperson and online
- Less condensation, reducing rings on a desk or in a car cup holder
- Insulation for longer beverage quality and enjoyment
